JRenteria2016@outlook.com | 917-856-6795 | New York, NY

TECHNICAL SKILLS

Expert: JavaScript, NodeJS, ExpressJS, AngularJS, PostgresSQL, HTML, CSS, Git/GitHub, Heroku
Intermediate: Ionic, JQuery, Bash, Chrome DevTools, Jira, BitBucket, Confluence
Novice: Ruby, C++, Docker, Jade, Sass, AWS, ,Zoom, Skype, MySQL, Web Sockets

RELEVANT WORK EXPERIENCE

Full-stack JavaScript Developer - Internship   February 2017 - Present
Forward Lane | *forwardlane.com*
- Worked with international software development team to resolve software issues
- Documented and updated new software developer on boarding process on Confluence
- Setup new software development tools as required
- Used expertise in Node.js to code, debug and integrate software features
- Maintained daily communication on ticket statuses through JIRA
- Mentored data scientists in NYC office on collaborative software development

Computer Programming Tutor   October 2014 - December 2015
Institute of Tutoring Services | *www.kbcc.cuny.edu/TutorialServices/Pages/TutorialServices.aspx*
- Tutored students in math (algebra and calculus) and programming
- Guided students on using problem solving strategies
- Clarified any computer science and math questions students asked
- Wrote student progress report after each session

PROJECT EXPERIENCE

Portfolio | *JoseRenteria.nyc* **|** *github.com/clockwrk/portfolio*   January 2017
Angular based single-page application for presenting projects
- Programmed all the front-end HTML, CSS and Javascript code
- Setup the server with NodeJS, ExpressJS and the database with PostgresSQL
- Added custom CSS animations
- Leveraged code injection to enhance the functionality of the site
- Deployed on Heroku

ImVue | *https://radiant-cliffs-28831.herokuapp.com* **|** *github.com/clockwrk/ImVue*   October 2016
Android mobile site that allows you to save an art project to a specific geolocation
- Designed the database scheme to store geolocation based art projects
- Wrote queries based on longitude and latitude to find art projects in a specified area
- Used Google Maps API to mark where projects were located
- Implemented user authentication using Passport

Markey | *markey.herokuapp.com* **|** *github.com/gewl/stackhub*   September 2016
eCommerce site simulating selling concert tickets
- Assembled the artist feature of the site from the front-end to the back-end
- Implemented user logging and session storage
- Resolved git conflicts and integrated features into a main development branch

EDUCATION

Fullstack Academy, Manhattan, NY   July 2016 - October 2016
- Software Engineering Immersive Program

Kingsborough Community College, Brooklyn, NY   March 2014 - January 2016
- Computer Science A.S.
- Graduated with 3.6 GPA

Per Scholas Institute for Technology, Bronx, NY   August 2013 - October 2013
- Comptia A+ and Network+ Certification
